

# SSS-5

## Swing Door Safety

### Full Swing Door Safety with only 1 PCB unit

The SSS-5, with 6 spots of detection per PCB unit ensures pedestrian safety levels exceeding EN16005 standards.

#### Maximise Pedestrian Safety

Only 1 PCB unit is required to provide 800 - 1,000mm of safety coverage along the swing door width.

#### Save on Costs

No need to use 2 PCB units in one sensor housing to ensure compliance with EN16005

#### Reduce Installation Times

Removable wiring terminal block and push button detection distance settings significantly reduces on-site installation time.

#### Strong & Robust

Solid, tough sensor body design not susceptible to vandalism or damage during installation

#### Performance Reliability

The SSS-5 performs reliably on all floor surfaces and reflective environments
